Tech Skills

- HTML5
- CSS
- JavaScript
- React.JS
- Next.JS
- Tailwind.css
- Styled-components
- Material UI
- Mongo DB

Soft Skills

- time-management
- active learning
- creativity
- attention to details
- Stress resistance (Im from Ukraine)

Frontend-Developer

Maxim Culoshnikov

My goals and achievements:

Goal: find a job as a front-end development. Preferably remotely, or in the office on the right bank of Kyiv.

I have experience with adaptive and responsive HTML/CSS layout. I know JavaScript and constantly improve my knowledge. I also work with Mongo DB, API, React.I learned development myself with the help of documentation and tutorials. For development, I would prefer to work with the Next.js. You can see my code, work and pet projects at the link to my [Github](#)

My projects:

1. [MCHPizzastore](#) [Next.js, Tailwind.css, MongoDB, Flowbite, NextAuth]
A web application developed by me for a pizzeria. With an admin panel and the ability to add new products and events. To enter the admin panel, write in the path /admin. Username: admin / Password: 123456
2. [MetaLanding](#) [Next.js, Tailwind CSS]
A simple landing page using animations when scrolling the page. Implemented using Framer Motion.
3. [My Portfolio](#) [React.js, Styled-components Mail.js]
This is my business card site, portfolio. Developed in React. I used styled components for styling.
4. [Image GEN](#) [MERN/Tailwind css]
This is a simple random image generator. Just enter text to generate a picture or select one of the existing prompts. The project is simple but covers both the client and server side of the work.
5. [Notes App](#) [React.js, Styled, LocalStorage]
A simple browser notebook powered by a browser API. (LocalStorage).Due to this, your entries will be displayed specifically in your browser.

My Education:

Open international university of Ukraine

Faculty of Law and Social Relations

September 2007 - May 2012 |
